HAND FORGED COLLECTION  
BY CARLISLE BRASS

Welcome to the Ludlow Foundries hand forged collection in Pewter Effect and Beeswax by Carlisle Brass.

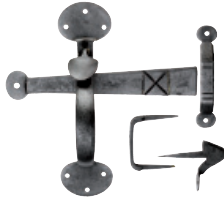

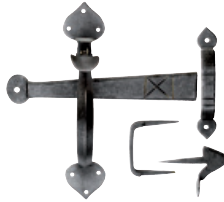

**What makes this collection different . . .**

- **All** our products are hand forged and individually crafted using traditional English blacksmithing methods and techniques.
- The unique designs complement period properties and restoration projects to create an “aged” look.
- Our comprehensive range ensures we have a hand forged product for most domestic ironmongery applications.
- Our master craftsmen maintain a consistency of quality throughout the ranges yet all of the products retain that individual feel.
- **All** of our lever furniture is sprung and can be fitted with standard latches (ideal for retro fit applications) due to a unique design feature.

If you have any questions relating to any of these products please contact our sales team on **01228 511030** or visit [carlislebrass.com](http://carlislebrass.com)

	BWPOLISH	CARLISLE BRASS BEESWAX MAINTENANCE POLISH 100ML				

### **Beeswax Finish** (for internal use only)

The beeswax finish is essentially the simple combination of hand forged metal finished with wax. Due to the simplicity, the finish is essentially everlasting as long as it is maintained correctly with Carlisle Brass wax.

Sometimes because of temperature changes your product may have a slight white bloom, we recommend that you polish it with a soft cloth and a small amount of maintenance wax to restore the finish.

If your product is fitted in a damp area such as a bathroom it may have the potential to exhibit surface rust. If this occurs we recommend that the product is cleaned with fine wire wool and Carlisle Brass maintenance wax is applied to restore the finish.

### **Pewter Effect** (for internal and external use)

Our Pewter Effect finish is extremely durable both internally and externally. The finish is electro plated and then stove lacquered and requires no more than an occasional wipe with a damp cloth and some soapy water. If you want a natural metal look with a maintenance free finish then our pewter effect is the logical choice.

### **Maintenance wax**

The use of maintenance wax is necessary to restore finish and afford protection to the beeswax range of products. If surface rust occurs then simply rub the affected area with wire wool and apply the maintenance wax with a rag or brush. It is important to note that where mechanical parts come together and there is abrasive movement, the wax surface will eventually be lost. We recommend that you oil these moving parts occasionally.

**NB:** There may be very slight colour or size differences with these products as every item is hand forged. Where this would be a problem with other ironmongery products we feel it actually enhances the appeal of this range.
