TrueScore System for Rosback Perforators

Perfect Crack-Free Scoring

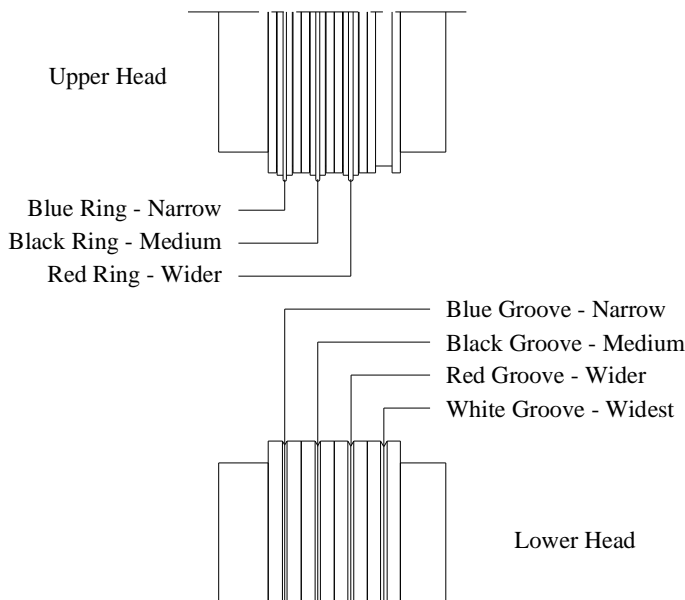

ROSBACK

Rosback has been providing world class perforating, creasing, and slitting solutions since 1881. The True-Line and 240XL series perforators provide quality, cost-effective perforating and creasing solutions that presses or folders cannot match. No wonder thousands of demanding print finishers ask for ROSBACK

Now add the TrueScore System to your ROSBACK perforator. The TrueScore System is designed for scoring any material including sensitive materials such as digitally printed stock. No more outsourcing difficult creasing jobs. The TrueScore system is so simple to use even inexperienced operators will enjoy perfect results.

HOW THE TrueScore WORKS

The upper head has a series of male rings holders. Color coded male rings are placed into the appropriate ring holder for a particular weight of stock. The lower head has various female groove widths. When the heads engage, the upper rubber ring gently stretches the fibers into the female ring, providing a deep, perfect crease and crack free fold every time.

EASY SETUP AND OPERATION:

- Choose a female groove width. Determine lower creasing head location for the job and lock into position.
- Choose a male ring. Position the upper head so that the male creasing-ring is centered over the chosen lower female groove. Lower the upper head with the pitch control lever. Fasten upper creasing head setscrew.
- Run a sheet through and adjust pressure as normal until the desired crease depth is reached.
- The same setting may be adequate for most material weights, however alternative crease widths can be used.
- To change inserts, place extracting tool into the slot located next to the creasing insert and gently lever out of channel.
- The blue coded ring produces a narrow crease, perfect for paper and light cover stock materials.
The black coded ring produces a medium crease.
The red coded ring produces a wider crease for heavier card and cover stocks.

TrueScore STANDARD EQUIPMENT:

- 1-Upper Male Head
- 1-Lower Female Head
- 1-Black Male Rubber Ring
- 1-Blue Male Rubber Ring
- 1-Red Male Rubber Ring
- 1-Extracting Tool
- 1-Allen Key for Heads

OTHER ACCESSORIES AVAILABLE FOR ROSBACK PERFORATORS:

- Quick-Align Perforating Heads
- Slot-Cut Heads. Produce a clean, highly visible and attractive line of perforation in 3 to 12 tpi.
- Knife-Cut Heads. Produce a clean, nearly invisible line of perforation in 3 to 12 tpi.
- Micro-Perf Heads. Very popular for refeeding printers. Produce a flat, strong perforation that leaves an exceptionally clean edge after separation. Available in 54 or 72 tpi.
- Slitting Heads. Cut multiple forms apart while you crease and slit.
- Scoring Heads. Many stock varieties.
- "CD" Inlay Heads. Produce CD inlay cards in single or multiple formats.
- Gutter Slit/Perf Heads. Slit apart multiple format jobs while ejecting scrap strips from the finished pieces.
- Pressure-Sensitive Slitting Attachment. Backslit or semi-slit labels and decals.
- Narrow Margin Perf Heads (3/8" From Sheet Edge)
- Special Slot-Perf Heads (1/2" Between Perf Lines)
- Easy Out Shafts. Dramatically reduce setup time when tooling changes are required.
- Special Engineered Heads. Chances are good we have done it before and can produce your special application quickly, saving you time & money.
