# Semi-Modern Aluminium Gates

Our Semi-Modern Range of Aluminium gates add a little something to the style of traditional wooden gates in a form that is both long lived and virtually maintenance-free.

**Bespoke** - Every driveway and pair of gate pillars or posts is unique so every set of Aluminium gates we supply is tailor-made for your precise requirements in the style and colour of your choice.

**Construction** - Just like a wooden gate, our Aluminium gates are carefully constructed from Aluminium sections which are precision-cut and joined in much the same way as wooden gate component parts.

This means that our Aluminium gates look much more like wood and appear just as beautiful from your house as from the road.

The major difference is that Aluminium does not shrink or swell, so our gate sections stay straight and true and our joints stay square and tight.

**Superb Finishes** - Our Aluminium gates are finished with an internationally recognized process called 'Qualicoat' which protects your gates with a strong outer coating that is **guaranteed for ten years.**

You can choose from a range of popular standard colour options for your new Aluminium gates as well as a variety of outstanding and incredibly realistic wood-grain finishes. And to extend the choices even further you can select from the entire range of RAL colours to have your gates finished in exactly the colour you want!

**Maintenance** - The incredibly tough surface coating and Aluminium's natural resistance to corrosion means that you really only need to wipe them down with soapy water to keep them looking brand new.

**Ordering** - The process couldn't be simpler. Once we have the required dimensions and your choice of style and finish, our Aluminium gates are manufactured to your exact requirements.

**They arrive pre-finished, complete with any hinges, locks and stops required, ready for installation.**

**Aluminium is the perfect choice** - We believe aluminium gates provide the best value you can buy as they give you all the following benefits:

- Made to order from high-quality aluminium that does not rust, rot, warp, twist, shrink or swell
- Great looking gates in any colour or a choice of natural-looking wood-effect finishes
- Qualicoat coatings that are guaranteed for ten years
- The gates mimic the look of wood with individual sections that are easily replaced thanks to the modular construction
- Virtually no maintenance is required over a very long life to keep gates looking as good as new
- Aluminium gates provide a very economical solution when measured over ten, fifteen or even twenty years.
