

After a long discussion over the categorisation of the Crown Wave and other similar machines such as Bravi Platforms' spin-go and sprint machines. The ABA have concluded that Category 3A is the most appropriate category for this machine type given its operational characteristics and implementation.

These machines are used in a wide variety of settings and for multiple purposes. Although the machines have not been designed to meet MEWP regulations, they are however used as a working platform to perform functions such as order picking and changing lightbulbs, they are also able to be driven elevated and boom vertically;
