- **FAST - DESIGNED FOR SPEED AND EFFICIENCY, NO FOAM BLANKETING.**
- **VERSATILE - USE UNDILUTED AS A GREASE SPOT REMOVER.**
- **FORMULATED WITH A THOUGHT TO OUR ENVIRONMENT.**

DESCRIPTION

NEW PILE is a low viscosity, clear, green liquid with a clean fragrance.

NEW PILE is a blend of emulsifiers, detergents, safety solvents, soil anti-redeposition agents, perfume and dye in an aqueous base.

APPLICATION

NEW PILE is specially designed for cleaning carpets and upholstery using the spray extraction technique.

NEW PILE can be used with either hot or cold water, although hot water gives the best results.

NEW PILE is designed for use as a pre-spotter for breaking up greasy deposits before going over the area with a hot water extraction machine.

NEW PILE is suitable for use on materials that can tolerate water. Do not use on any fabric that must be dry cleaned.

AREAS OF USE: Hotels, clubs, public houses, nursing homes, residential homes, offices, car valeting, bus companies etc

METHOD OF USE

1. Always thoroughly vacuum the carpet before any wet cleaning process.
 2. Dilute **NEW PILE** with hot water in the detergent tank of the extraction machine as follows:
Normal use - 1 part of **NEW PILE** to 80 parts of hot water.
Heavy duty - 1 part of **NEW PILE** to 40 parts of hot water.
 3. Clean the carpet/fabric taking care to extract as much liquid as possible. Go over areas of high dirt levels several times if necessary. Do not rub the carpet, use the lance in a slow steady motion.
 4. Allow the carpet/fabric to dry, preferably overnight. Any furniture should be moved away from the wet carpet areas, or placed on waterproof coasters to prevent the risk of staining from metal castors, etc.
- N.B. Always test a small unobtrusive area of carpet with a white cloth dipped in the solution of **NEW PILE** to be used.
