

VEHICLE WASH & WAX

CLEANS AND SHINES ALL VEHICLES

- * SPARKLING FINISH TO VEHICLE PAINTWORK.
- * VERSATILE - NEUTRAL, SAFE ON ALL SURFACES.
- * CONTAINS ADVANCE POLYMERIC WAX.

WASH & WAX is a rich opaque yellow viscous liquid. The formula consists of surfactants and waxes emulsified in an aqueous base.

WASH & WAX is used extensively throughout the automotive industry to clean paintwork, bodywork, plastic, rubber, Perspex and aluminium leaving a shiny finish, free from streaks and spotting.

Dilute at 1 part **WASH & WAX** to 150 parts warm water. Apply with a sponge or cloth, start at the highest point to be cleaned. After cleaning rinse off thoroughly, alternatively mop up surplus liquid with a well rung out sponge or leather.

Do not exceed the recommended strength and avoid cleaning whilst vehicles are exposed to hot sun.
